## **Chord symbols**

In the chapter Chord progressions for exercises chord symbols are shown. If you hold the guitar in playing position, the 6th string is on top. The strings are numbered from bottom to top.

The frets are marked with Roman numerals. The fingerings with numbers.

# **Fingering**

- 1: Index finger
- 2: Middle finger
- 3: Ring finger
- 4: Pinkie

#### **Strumming Pattern**

Arrows in downward direction (black) symbolize downstroke, arrows in upward direction (orange) symbolize upstroke.

The numbers below the arrows show you how to count. If no arrow is entered above a count time, no stroke is made at this point.

#### **Strumming technique**

It doesn't matter whether you strike the strings with your fingers or a pick. The technique is very similar, although the sound is different.

With downstrokes, you make an even downward movement across the strings.

You usually start at the root of the chord and play all the strings below. If you don't start at the root of the chord, which is not always so easy, many chords sound a bit washed out, because the lowest note struck is not the root.

When playing upstrokes, you usually don't play all strings. Rather only the high strings, e.g. only strings 1, 2, 3 and 4. Sometimes more, sometimes less.

How to count INTRODUCTION

The following illustrations show the different counts for beat patterns shown in this eBook.

As you can see, the numbers (the quarters) are in the same place in all the examples.

These quarters form the basic framework. The time between these quarters can be filled with 1 beat (eighths) or also with 3 beats (sixteenths). A special form are the triplets, because between the quarters 2 strokes are distributed, so that a very concise rhythm arises, which one knows e.g. from the waltz.

Interesting rhythms are created when you omit some of these beats at certain points, or use an upstroke instead of a downstroke.
